

Collective Emergence: A New Possibility

The Universe has proceeded through a series of creative unions! Atoms unite to form molecules, molecules unite to form cells and so the story goes. Each new union brings forth greater possibilities and more depth of being. The French Jesuit and Paleontologist Teilhard de Chardin predicted that the next creative union would be us, the human community! Creative union happens when we come together in new ways, beyond separation. During our day together, through guided practices, input and the sharing of a series of visual paintings we will create a space together where something new can break through.

Saturday March 4th 10am – 4pm (2017)
Led by Marg Kehoe & Gail Worcelo

Full Accommodation, catering and input: \$110/day; Accommodation, self-catering and input: \$80/day; Day only attendance, self-catering and input: \$60/day.
